Professional Summary

Software Developer with 1.5 years of experience building and maintaining web applications using React, TypeScript, Node.js, and Express. Currently contributing across the stack to three production applications, delivering features and improvements for real-world customers. Modernized a legacy application by improving usability, performance, and code quality. Looking to grow as a product-focused engineer while building scalable software used at scale.

Experience

Software Developer

Jul 2025 – Present

TechMaxima Pvt. Ltd.

- Owned development of three production applications, delivering frontend and backend features using React, TypeScript, Node.js, and Express.
- Shipped 10+ customer-facing features while modernizing legacy codebases and improving maintainability.
- Improved legacy applications by refactoring code, fixing issues, and building new features.

Projects

ChatMaxima Widget - AI-Powered Customer Support Widget

React, Next.js, TypeScript, Tailwind CSS, Shadcn UI

- Modernized a legacy chat widget by redesigning the UI and refactoring core components for improved maintainability.
- Built and launched customer-facing features including Session Replay, Multilingual Support, and Page Agent.
- Productionized AI-generated features by resolving defects and improving reliability.

ChatExpress - Socket Management System

Express, SocketIO, Redis, Tailwind CSS

- Resolved socket connection leaks by improving connection lifecycle management, improving system stability.
- Built a real-time monitoring dashboard to track socket health, connections, and system activity.
- Optimized socket communication by replacing manual client management with Socket.IO rooms.

Skills
